TECHART for the 911 GT3 models.

The TECHART Carbon Aerokit for the 911 GT3.

The eye-catching aerodynamic TECHART carbon parts highlight the racing DNA of the Porsche 911 GT3 and 911 GT3 with Touring Package, while retaining the aerodynamic concept of the sports car at the same time.

The 15 millimeter wider TECHART lightweight front fenders with integrated wheel arch louvers as well as the TECHART carbon aero front hood with its striking air shaft make an impressive appearance.

Large air intakes at the front, a prominent front spoiler and an air intake panel in the front apron, TECHART carbon sport side mirrors and side skirts as well as the lower part of the rear apron – all made of high-quality TECHART visible carbon – replace the standard components.

The TECHART upgraded 911 GT3 also features a rear wing made entirely of carbon fiber with powerfully shaped wing end plates and a carbon air intake on the rear lid.

**Everything you would expect from your GT3.
And a level of individuality you wouldn't.**

The scope of the TECHART carbon package for the 911 GT3 can be configured individually and enables tailor-made refinement of the vehicle. The lightweight front fenders come paint-ready. All other parts of the TECHART carbon aerokit are available in matt or high gloss visible carbon fiber finish.

If desired, the aero hood can optionally be ordered paint-ready instead.

With the TECHART rear lettering made of three-dimensionally cast acrylic glass letters, GT3 owners underline the sporty character of their personalized vehicle and make it a true one-off.

Exterior & Aerodynamics in detail.

- 1 TECHART carbon front spoiler and spoiler trims
- 2 TECHART carbon front air intake panel

- 4 TECHART carbon rear air intake panel with service hatch

Tailor-made TECHART sports steering wheels and interior refinement.

A custom made TECHART steering wheel is a signature feature for your Porsche, handcrafted at the renowned TECHART upholstery shop. Painted surfaces, leather and Alcantara® segments as well as carbon fiber trims, pipings, stitchings and perforations create an endless variety.

With its wide range of customization options, the TECHART interior manufactory offers you even more freedom of design for your GT3. Such as precious leather, Alcantara® motorsports-inspired heritage fabrics and, of course, genuine TECHART interior carbon parts and trims.

**TECHART Clubsport Upgrades:
Roll bar and FIA certified 6-point-harness.**

The TECHART roll bar comes with a parts certificate and offers additional safety and an unmistakably sporty look.

For the racetrack, FIA homologated TECHART 6-point racing harnesses are available in black, red, green or yellow.

The new TECHART Formula VII forged wheel with central lock.

The expressive TECHART Formula VII forged wheel combines striking turbine styling and low weight, made with modern forging technology. The spectacular new wheel debuts as a part of the TECHART program for the 911 GT3 models.

The wheel dimensions for the Porsche 911 GT3 are 9.5 x 20 inches at the front and 12 x 21 inches at the rear. The new wheel design enables further personalization options with numerous variants and sophisticated surface finishes to make it a perfect match.

**True individuality and peace of mind go well together.
TECHART PROTECT.**

The TECHART PROTECT Warranty was specifically designed for individualized new and pre-owned Porsche vehicles.
