

Leonberg, March 17<sup>th</sup>, 2022

## **TECHART carbon fiber kit for the Porsche 911 GT3 and new Formula VII forged wheel.**

**Racing at first sight. TECHART presents the lightweight carbon program for the Porsche 911 GT3 and the 911 GT3 with Touring Package - available from summer 2022. Carbon fiber fenders, 15 millimeter wider wheel arches, an aerodynamic front lid in carbon fiber and extensive styling refinements to the front and rear ensure a sharper appearance. The new TECHART Formula VII forged wheel is also available for the 911 Carrera GTS.**

### **Striking visible carbon fiber upgrades.**

With the eye-catching aerodynamic parts made of genuine carbon fiber, TECHART clearly highlights the racing DNA of the Porsche 911 GT3 and 911 GT3 with Touring Package, while retaining the aerodynamic concept of the sports car. The 15 millimeter wider TECHART lightweight fenders with wheel arch louvers and the carbon aero lid ensure an impressive appearance in the rear-view mirror. Largely dimensioned air inlets at the front, a prominent front spoiler lip and air inlet panel in the front apron, sports side mirrors and side skirts as well as the lower part of the rear apron – all made of high-quality TECHART visible carbon – replace the standard components. The TECHART upgraded 911 GT3 also features a rear wing made entirely of carbon fiber with powerfully shaped wing end plates and a carbon air intake panel on the trunk lid.

The TECHART carbon package for the 911 GT3 is freely configurable and enables the TECHART-typical tailor-made refinement of the vehicle, either in matt or high gloss visible carbon or the renown TECHART forged design carbon. A large selection of TECHART carbon fiber parts are manufactured by hand in the in-house carbon production facility. With the TECHART rear lettering made of three-dimensionally cast acrylic glass letters, GT3 owners underline the sporty character of their personalized vehicle and make it a true one-off.

### **Handcrafted TECHART sports steering wheels and exclusive interior details.**

With Alcantara®, leather and motorsport-inspired heritage fabrics as well as carbon trim parts, the TECHART manufactory offers Porsche 911 GT3 customers endless possibilities to give their vehicle a personal touch in the interior.

### **Dynamic turbine look: the new TECHART Formula VII forged wheel with central locking for Porsche 911 GT3 and 911 Carrera GTS.**

A unique turbine styling combined with low weight and modern forging technology. The expressive TECHART Formula VII forged wheel meets all the requirements to become a future classic in the world of wheel designs. The spectacular lightweight wheel with central locking celebrates its premiere as part of the customization program for the 911 GT3 models. It will also be available for the Porsche 911 Carrera GTS.

The wheel dimensions for the Porsche 911 GT3 are 9.5 x 20 inches at the front and 12 x 21 inches at the rear. For the 911 Carrera GTS, the TECHART Formula VII wheel is available in the sizes 9 x 20 inches and 11.5 x 21 inches. The new wheel design enables further personalization options with numerous variants and sophisticated surface finishes - individually tailored to the vehicle.
