World premiere: TECHART power kit for Porsche E-Hybrid models

Leonberg, November 26th, 2018

Hybrid drive systems have established themselves in the luxury segment of the automotive world. Both in everyday life and in motorsport. And the individuality? TECHART shows it! TECHART presents the new power kit for the Porsche E-Hybrid models at the Essen Motor Show 2018. Previously, the spectacular implementation: the TECHART GrandGT based on Panamera Turbo S E-Hybrid Sport Turismo.

More power from two hearts.

The TECHART TECHTRONIC power kit for the Panamera Turbo S E-Hybrid. It increases the standard combined power from 680 hp to 770 hp. The combined torque increases from max. 850 Nm to powerful 980 Nm. 0 to 100 km/h: 3.2 seconds. Top speed: 316km/h. Thanks to an intensive development and testing process, the power increase provides optimal interaction between the electric drive and the V8 engine. In conjunction with the valve controlled TECHART exhaust this combination with a deeper and more powerful V8 sound is a joy to your ears. It sounds spectacular, it feels impressive and it looks great. Because the exhaust with four titanium end tubes and carbon-fiber jacket is an unequivocal statement.

Product information about the other E-Hybrid power kits from TECHART will follow soon.

The customer is always on the safe side with the TECHART power kit. The TECHART PROTECT Warranty for individualized new and pre-owned Porsche vehicles is purpose-made for every Porsche model and provides comprehensive cover for all possible contingencies. Today's and tomorrow's. Outside Europe, the TECHART TECHTRONIC Warranty provides security for your engine and drivetrain.

World premiere: TECHART power kit for Porsche E-Hybrid models

Powerful appearance.

The TECHART GrandGT styling package for the Panamera sets standards in terms of look and quality. The lines and appearance are unmistakable. A wider front part with carbon fiber hood, powerful extended wheel arches, contoured side skirts and the significantly wider track are characteristics of the GrandGT. At the rear: the distinctive rear apron strikes the eye with its repositioned rear reflectors, its side air outlets and its apparently levitating diffuser with four distinctive fins framing the carbon-coated titanium twin tailpipes.

TECHART's new 22-inch Formula V wheels fit into the overall picture perfectly. The unique multi-spoke design makes the wheel appear particularly large in the wheel arch. An optical advantage that meets its requirements, especially for large Porsche models such as the Panamera and the Cayenne.

Perfect interaction in the interior.

Tailored to the overall concept, the TECHART interior manufactory refines the interior to the smallest detail. The seats e.g. got stitchings with colored threads to match the exterior design. The ergonomically shaped TECHART sport steering wheel with Acid Green colored drive mode switch and well straight-ahead marker is a sign for the hybrid drivetrain. The segments of the sport steering wheel can be individually refined with leather, Alcantara® or carbon fiber. Illuminated door entry guards with TECHART lettering and aluminum pedals complete the interior.
