**TECHART lets all 4-cylinder 718 owners catch up with the GT class.
Considerably more bite for Porsche's 718 – now in a limited time package deal.**

For all 718 Boxster and Cayman drivers, TECHART provides enhancements in terms of both styling and performance, increasing the 4-cylinders' powerful appearance and driving characteristics.

In a limited time offer, TECHART has now released a GT Package for all 718 Cayman models. Until August 31st, Drivers of a 718 Cayman or Cayman S, a 718 Cayman T or a 718 Cayman GTS can upgrade their model with TECHART's front spoiler I and the GT-style Rear Wing II at 2,390.00 EUR plus VAT and installation/paintwork.

Available as an option: TECHART's new warranty for individualized new or pre-owned Porsche vehicles which provides independence from the car manufacturer's warranties.

TECHART aerodynamics and design for 718 Boxster and 718 Cayman

The TECHART aerokit for the new Porsche 718 Cayman and 718 Boxster models, boosts the dynamic appearance of these mid-engined sportscars. The front apron gets optically extended by the two-piece TECHART front spoiler with its integrated splitter. A central air outlet helps to reduce the aerodynamic lift. As well as the front splitter, the air outlet is available in black PU-RIM or carbon fiber.

For the GTS models as well as for all 718 featuring Porsche's SportDesign Package, TECHART offers a special multi-part front spoiler for even sportier looks.

Unmistakably inspired by motorsports: the GT-style fixed rear wing II for the 718 Cayman. Its prominent wing profile rests on anodized aluminium uprights. A smaller version, the Rear Spoiler I, is available for 718 Boxster and Cayman as an alternative.

PRESS INFORMATION

TECHART carbon fiber options

The range of TECHART carbon fiber parts offers additional opportunities to add motorsport highlights to the 718 models: besides the front splitter, TECHART carbon is available for the airblades, the side mirrors, the side air intakes, the diffuser, trims and for the rear wing profile. Last but not least, TECHART offers a lot of carbon options for the 718's interior, too.

TECHART Powerkits enable a 0-100 km/h sprint in just 3.8 seconds with up to 415 hp.

More sport in sport mode is available for the 718 S and 718 GTS models with TECHART's easy to install powerkits. With the TECHTRONIC power upgrades, the power-boosted models do not only accelerate faster than the standard versions. Even compared to the new 6-cylinder models 718 Cayman GT4 and 718 Spyder, the TECHART-powered 4-cylinders shrink the gap between standstill and 100 km/h.

In the 718 Cayman S and 718 Boxster S, the 2.5 l flat-four engine with TECHART TECHTRONIC provides 480 Nm of torque to the rear wheels (series: 420 Nm), accelerating from 0 to 100 km/h in 3.9 s. Fueled by a total power output of 400 hp, it provides a top track speed of 296 km/h (series: 350 hp / 285 km/h).

For the 718 GTS models, TECHART's powerkit enhances the standard 269 kW (365 hp) to 306 kW (415 hp) and increases the maximum torque by another 60 Newtonmeters.

TECHART exhaust system »Racing«

The TECHART exhaust system »Racing« creates a deep, powerful boxersound with a clear difference between "Normal" and "Sport" setting. The valve control is invisibly integrated and easy to use due to its connection to the standard Sport Button or the optional mode switch. For the 718 models, the TECHART exhaust system »Racing« features two central titanium tailpipes with carbon fiber tips, that give an unmistakable statement. As an option, the TECHART exhaust system »Racing« can also be installed with the factory tailpipes.

PRESS INFORMATION

TECHART wheels and chassis enhancements

The 30 mm lowering, combined with the weight-optimized 21-inch Formula IV alloy wheels, put the mid-engined 718 models in the spotlight. Progressive TECHART sports springs provide a direct and sporty road handling.

The TECHART Formula IV alloy wheel with its dynamic twin-spoke design is available in 9 x 21 and 9,5 x 21 inch for the Porsche 718 Cayman and 718 Boxster models. Besides the attractive standard color variants, all TECHART wheels are also available in individually matched custom colors.

TECHART's front axle lift system helps to avoid restrictions in everyday use. According to Porsche, the SportDesign Package reduces ground clearance significantly. TECHART's reliable Noselift system provides up to 60 mm of additional space at the front spoiler at the push of a button. The system includes two front axle sport springs (each with main and helper springs), two rear axle sport springs, two hydraulic cylinders, and a notably compact and space-saving hydraulic unit.

TECHART interior design

The in-house saddlery transfers the individual preferences of its owner to the interior design of the Porsche 718 Cayman and 718 Boxster models, manufactured by TECHART in unsurpassed craftsmanship. The illuminated TECHART aluminium door entry guards give an eye-catching welcome. Besides full individual treatment of the interior, TECHART assists its customers in setting selective highlights such as any kind of leather refinement and upholstery, decorative stitchings, carbon made or lacquered seat backpanels, in-house produced carbon trims and lacquered surfaces or color-matched instrument dials.

PRESS INFORMATION

Customization with peace of mind: genuine TECHART is warranty-backed.

In addition to the statutory warranty, TECHART offers two guarantee programs, which make it literally risk-free for Porsche owners to go for TECHART refinement. Already included in the powerkits and valid world-wide is the TECHART TECHTRONIC warranty which covers engine and drivetrain.

As an option, the new TECHART PROTECT warranty covers the complete vehicle. Valid Europe-wide for new and for pre-owned Porsche cars, it does not only include a 111 point vehicle check and a mobility warranty package but also ensures 0% own contribution or advance payment.
