TECHART adds new power and styling upgrades for the V6 Cayenne models.

A new engine powerkit for the Cayenne as well as new body styling options for the Cayenne, Cayenne S and Cayenne E-Hybrid models enhance TECHART's individualization program for the Porsche Cayenne range. The power upgrade for the Cayenne is a new option among the existing powerkits for the E-Hybrid and Turbo models. Another TECHART powerkit for the Cayenne S will follow within short time. All powerkits are also available for the referring Coupé models.

Just like TECHART's engine enhancements for the Cayenne E-Hybrid and Turbo, the new Cayenne option uses the reliable TECHART TECHTRONIC engine management. It empowers the Sport mode by adding another 29 kW (40 hp) and boosts the maximum torque by 100 Newtonmeters.

The TECHTRONIC is designed to be fitted quick and trouble-free by any Porsche specialized workshop and the result of the short stay is impressive: the run from 0 to 100 km/h or 62 mph is completed in just 4.9 seconds, beating the time of the standard model clearly. The lead grows to 2 seconds accelerating 0 to 160 km/h or 100 mph. The maximum speed top of 253 km/h tops the speed of the standard Cayenne by approx. 10 km/h.

New aerodynamic styling components for the V6 models.

Before, the TECHART front spoiler was only available for the Cayenne Turbo or vehicles featuring the Sport Design Package. The new front spoiler was specially designed for the standard front aprons of the Cayenne, Cayenne S and Cayenne E-Hybrid. A new roof spoiler is now also available for these models.

In addition, all other exterior options of the TECHART individualization range are available. Such as the aerodynamically shaped carbon front lid, the contoured side skirts, the powerful rear apron and diffusor element as well as sporty styling details like the rear hatch spoiler.

PRESS INFORMATION

All-round TECHART treatment for the Cayenne.

TECHART wheels, sport exhaust systems, chassis options as well as TECHART's versatile interior customization program offer any freedom of choice in order to configure a very personal Cayenne. The interior design upgrades range from subtle color-matched accents to custom-made steering wheels and further to unique handcrafted interiors. Top of the range feature for the Cayenne is the exclusive TECHART interior designed in cooperation with the Germany-based furniture brand ROLF BENZ.

Customization with peace of mind: genuine TECHART is warranty-backed.

In addition to the statutory warranty, TECHART offers two guarantee programs, which make it literally risk-free for Porsche owners to go for TECHART refinement. Already included in the powerkits and valid world-wide is the TECHART TECHTRONIC warranty which covers engine and drivetrain.

As an option, the new TECHART PROTECT warranty covers the complete vehicle. Valid Europe-wide for new and for pre-owned Porsche cars, it does not only include a 111 point vehicle check and a mobility warranty package but also ensures 0% own contribution or advance payment.
