TECHART individualization and power boost to up to 750 hp for the Porsche Cayenne models.

New TECHART Engine Powerkit for the Porsche Cayenne GTS completes the TECHART individualization program for the Cayenne models.

With the dynamic TECHART Aerokit, powerful engine upgrades, new sports exhaust systems and five TECHART wheel designs as well as fully tailor made interiors, TECHART offers a wide refinement and individualization program for the current Porsche Cayenne models.

In particular the performance upgrade for the Cayenne GTS with an additional power of 133 kW (180 hp) and an increased torque of 250 Newtonmeters is more than impressive. Furthermore, it races from 0 to 100 km/h a full second faster than the series vehicle. However, that is not all, equipped with the TECHART Powerkit it slashes the sprint time from 0 to 200 km/h by five seconds to 12,5 seconds overall compared to the regular model.

The core of the powerkits is the TECHART TECHTRONIC engine management system. The installation is easy and quick, and it can be done by every authorized TECHART sales partner without touching the standard engine management.

TECHART highlights its status as a premium brand with the european-wide TECHART PROTECT Warranty as well as the TECHART TECHTRONIC Warranty outside Europe for individualized new and pre-owned Porsche vehicles.

PRESS INFORMATION

Distinctive exterior styling with the TECHART Aerokit.

The TECHART Aerokit for the Cayenne SUV and Coupe models provides extensive body styling options. With a dynamic front view and an aerodynamic front hood, entirely made of carbon fiber as well as an extremely powerful rear end, the TECHART body styling is a statement of individualism.

Its independent front spoiler design and the carbon fiber aero engine lid featuring distinctive air intakes, integrates seamlessly with the Cayenne body styling. Discreet. But nonetheless, the TECHART Aerokit for the Cayenne models embodies both elegance and sportiness, setting it apart from the standard models. The rear view presents the contoured rear hatch spoiler and the add-on lip for the Cayenne's roof spoiler. The powerful design of the rear apron incorporates a diffuser and surrounds the TECHART sport exhaust system and its stainless titanium/carbon fiber tailpipes perfectly.

For maximum individualization opportunities, parts of the TECHART Aerokit as well as standard body parts can be varied and combined according to individual preferences. The new three-dimensional TECHART lettering for the Cayenne's rear allows to visibly set the individualized vehicle apart from the series models.

Good to know: the TECHART Aerokit is also available for all Porsche Cayenne models with towbar system as well as for all US-versions.

Impressive power boost up to an additional 180 hp and emotional TECHART sound for the Cayenne models.

Powerful engine enhancements are provided by TECHART for the full range of Cayenne models. This includes: Cayenne, Cayenne S, Cayenne E-Hybrid and Cayenne Turbo as well as Cayenne Turbo S E-Hybrid. New to the portfolio is the TECHART powerkit for the Cayenne GTS. All powerkits are available for the Coupe models.

The new TECHART TECHTRONIC powerkit provides additional 180 horsepower (133 kW) at the push of a button and the maximum torque is increased by 250 Newtonmeters to a total of 870 Newtonmeters. The maximum speed is raised by 30 km/h compared to the series model to 300km/h. The TECHART

TECHART sports exhaust systems.

Audible driving pleasure, EU type-approved: the TECHART Rear Muffler with electronic dynamic valve control. Depending on the model, it is compatible with the series tailpipes and for a perfect match, it can be combined with the TECHART titanium/carbon fiber sport tailpipes. The system features a TECHART silencer made of polished stainless steel with two electronic exhaust valves and TECHART dynamic valve control management.

Export only: TECHART Sports Exhaust Systems featuring a muffler replacement pipe provide a pure racetrack soundscape. Unfiltered racing sound is provided by a special sound bypass device which replaces the center muffler.

PRESS INFORMATION

Extensive TECHART wheel range with light alloy and forged rims as well as sports chassis.

The extensive TECHART wheels program sets a statement for individualization – from timeless classic to the low-weight sport-oriented styling. If desired, decorative accents in individually selectable colors can be added for selected wheels.

The TECHART Formula V multi spoke wheel comes bi-colored in titanium grey/gloss turned or black/gloss turned, while the low weight and particular sport-oriented styled forged 22-inch Formula VI wheel can be chosen single and multi color painted, with an optional gloss turned front surface.

The TECHART Daytona II forged wheel is available in 22-inch for the Cayenne models. It can be configured individually in one- or two-tone color with an optional gloss turned front surface. If desired, the wheel can be ordered in the variant Dualpaint: uni color finish, front surface accentuated in the RAL color of your choice.

The five-spokes TECHART Formula wheel is available in 23-inch, while the TECHART Formula IV wheel reinterprets the renowned TECHART Formula wheel design in a sporty five twin-spokes structure. Available for the Cayenne models in 22-inch, it adds new great TECHART styling options for both SUV and Coupe.

Wheels can be individually highlighted by a high-temperature resistant color-coordinated coating of the brake calipers. TECHART spacers create a wider track and add an even sportier look to the vehicle and increase its presence immediately. Even at standstill.

Sport springs add a good dash of sportiness in terms of visual appearance and driving dynamics by lowering the ride height by 35 mm compared to the standard springs. TECHART sport springs are available for Cayenne and Cayenne S without air suspension.

PRESS INFORMATION

Limitless freedom and innovative fabrics: high-quality interiors handcrafted by the TECHART Manufactory.

Handcrafted masterpieces, custom-built. There are no limits in the design of the Porsche Cayenne Interior thanks to the TECHART Saddlery. From punctual highlights to a uniquely designed TECHART interior, created of supple, natural leather.

Signature features for the Cayenne are custom made TECHART sport steering wheels or individual refinement of standard Porsche steering wheels. The combination of painted surfaces, leather and Alcantara segments as well as carbon fiber trims, matching pipings, stitchings and perforations creates an endless variety of options. Needless to say that standard features such as multifunction, paddle shifts or steering wheel heating are maintained.

And while fine leather has always been a renowned TECHART specialty, a novelty in the range of premium interior refinement is the processing of natural virgin wool – a genuine upholstery fabric of outstanding quality. The premium material is hard-wearing and breathable. At the same time, it is matchless in terms of softness and naturalness. Manually processed in the Cayenne's interior, the harmonious overall appearance of the woven fabric does not only create a unique look and feel, but it also creates amazing homelike interior acoustics.

PRESS INFORMATION

TECHART Automobildesign. The Brand. The Company.

TECHART Automobildesign GmbH, with its headquarters in Leonberg near Stuttgart, sets global standards in terms of premium refinement for Porsche cars. Founded in 1987, TECHART has been living this passion for over 30 years. With consistent implementation of own ideas and developments, high quality standards and continuous brand development, the company became an internationally renowned trademark with sales partners all over the world.

TECHART's product range offers refinement options for any Porsche model and every section of the vehicle : aerodynamic improvement and exterior styling, technical optimizations such as engine powerkits, exhaust systems, wheels, suspensions or assistance systems, as well as bespoke interior personalization, manufactured by TECHART's inhouse saddlery and upholstery shop.

Approved as an internationally registered vehicle manufacturer and certified as Authorized Economic Operator (AEO-F) by the European Union, TECHART is the premium brand for the refinement of Porsche cars worldwide.
